SCAN

The SCAN series has been developed especially for applications in upright microscopes that require automatic and very exact positioning of samples. Enhanced by special adaptations, these microscope stages are perfectly in line with nearly all current microscopes.

With ranges of travel from 75 x 50 mm up to 600 x 600 mm these systems can also reliably carry out high-precision positioning performances in application areas beyond microscopy.

A special long-term lubrication system guarantees that specifications are maintained, even after a very long running period.

"Plug and play your microscope":

The integrated electronic stage identification device ETS enables automatic identification of the scanning stage as well as the parametrization of the controller.

The SCAN series does not only define new quality standards, but also makes them measurable:

Märzhäuser issues a 5-YEAR GUARANTEE on all scanning stages, which are operated in the system with the Märzhäuser Tango controller!

■ Märzhäuser Controllers

Complete systems with a maximum system performance: Märzhäuser Wetzlar also offers you controllers.

SCAN IM

The SCAN IM series has been developed especially for applications in inverted microscopes which require automatic and very exact sample positioning.

Enhanced by special adaptations, these microscope stages are perfectly in line with nearly all current inverted microscopes.

According to their designated range of application these systems can be optionally upgraded, for example with custom-designed stage inserts or [Piezo-Z stages](#).

A special long-term lubrication system guarantees that specifications are maintained, even after a very long running period.

The SCAN IM series does not only define new quality standards, but also makes them measurable:

Märzhäuser issues a 5-YEAR GUARANTEE on all scanning stages, which are operated in the system with the Märzhäuser Tango controller!

▣ Märzhäuser Controllers

Complete systems with a maximum system performance: Märzhäuser Wetzlar also offers you controllers.
